

## School of Geosciences: Outreach and Engagement Course

**What is it?** A project-based course where **students create an outreach project** that communicates some element of the field of GeoSciences and related subjects beyond the university community

As of 2016 there is an **OER component** to the assessment

TES connect stats from course output

**9**

resources

**162**

downloads

**353**

views

### Involvement of the Psychology Department

This year, for the first time, **students from the Psychology Department took part in the course** and created resources, three of which, on the Human Brain, Advertising Tactics and Prejudice Reduction, have been uploaded to TES connect

### School of Geoscience OERs

Other School of Geoscience created OERs include:

- lesson plans for improving school pupils' **data handling** skills
- a card game on climate change to develop **discussion and decision making** abilities

### Student Summer Intern

This is the **second year** EDE have employed an intern to assist in the processing of resources from the course

Images are all used in this year's resources. From top to bottom they appear in:
